SUMMARY

- Computer Science undergraduate with expertise in AI, Edge Computing, Full-Stack Development, and Cybersecurity, building scalable, intelligent software solutions with real-world deployment experience.

EDUCATION

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY - B. Tech Computer Science and Engineering 2023 - 2027
CGPA: 8.35 (6th Semester)

TAGORE PUBLIC SCHOOL 2022 - 2023
Class: 12 | Percentage: 68.5%

MAHARISHI INTERNATIONAL RESIDENTIAL SCHOOL 2020 - 2021
Class:10 | Percentage: 65.6%

TECHINICAL SKILLS

- Programming Languages: Python, Java, HTML, JavaScript, CSS, Type Script.
- Technical Skills: Penetration Testing, Prompt Engineering, Full Stack Web Development, Cyber Tools, Kali Linux.
- Frameworks & Libraries: Pandas, NumPy, OpenCV, React.js, Node.js, Prisma.
- Databases: PostgreSQL, MongoDB, GCP (Google Cloud Platform).
- Development Tools & Practices: Git, VS Code.

EXPERIENCE

CYBERSECURITY INTERN | PROMPT INFOTECH | Coimbatore, India June 2025 - July 2025

Completed cybersecurity internship at PROMOT INFO TECH, gaining hands-on experience with tools like Metasploit, Wireshark, Airmon-ng, and Kali Linux. Developed practical skills in ethical hacking, network security, and penetration testing through collaborative, real-world learning.

ACHIEVEMENTS

- Secured 2nd Place in the track at SaRaM Project Day 2026 for *Aura Vision*, an Edge AI-powered vision assistant for the visually impaired

PROJECTS

AURA VISION -AI VISION ASSISTANT FOR THE VISUALLY IMPAIRED

- An Edge-First Real-Time Vision System Using Dual Yolov8 with Temporal Gating, Integrated with Blip and a Local Lama Layer for contextual, Low-Latency insights and audio feedback. Optimized and deployed the full pipeline on Raspberry Pi 4 (8gb) for efficient CPU-Only execution with stable, Real-Time Performance.

MANAGE+

- Built a full-stack enterprise project management platform using Next.js 16, React, Prisma ORM, and TypeScript with 30+ dashboard pages (Kanban, Sprint Planning, Risk Heatmap, Budget Tracking, Impact Analyzer) supporting 120+ users and 500+ tasks.Developed an Autonomous PM Agent and Consequence Engine powered by Llama 3.3 70B that detects blocked/overdue tasks, performs constrained reassignments, and propagates downstream impact notifications — achieving 43% faster blocker resolution and 31% better workload balancing

Aero Scan

- Developed a network security tool to scan IPs/URLs, identify open ports, detect services, and map potential vulnerabilities with latency insights. Generated developer-friendly reports with risk levels and remediation steps, enabling faster detection and mitigation of weak configurations.

EXTRA CURRICULAR ACTIVITIES

- Horse Riding – Trainer
- PC Building – Expert in Consulting and Assistance
- Farming – Inheritance of family
